Centralized Cloud-Based Fuel Data Management

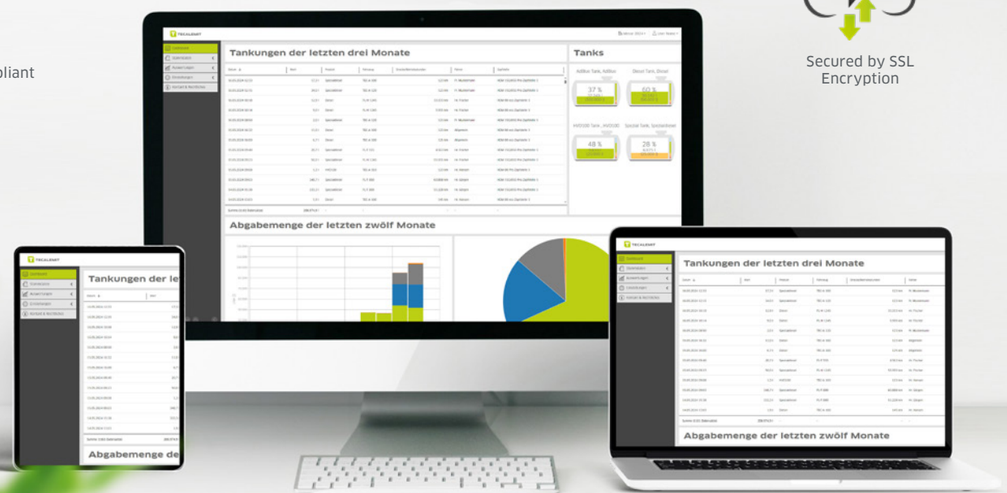

TECALEMIT

AN ADVANCED FLOW TECHNOLOGIES BRAND

Servers Hosted in Germany

Fully GDPR-Compliant

Secured by SSL Encryption

Smart Fuel Data Management for Maximum **Cost-Efficiency.**

With the myTecalemit Cloud, you seamlessly connect your fuel terminals, tank level gauges, and fleet processes into one intelligent, integrated system.

Streamline your operations: Cut process costs, eliminate manual tasks, and sustainably increase your bottom-line productivity.

Inquire now

The myTecalemit Dashboard

Intuitive & Browser-Based Manage all your data and devices flexibly, right from your web browser.

Rapid Onboarding Create drivers and vehicles in a flash via quick CSV import.

Complete Overview See exactly what is happening at your depot, instantly.

Smart Automated Reporting

Automated Reporting Configure your reports once, and receive them fully automatically via email.

Full Data Export Export all data as CSV or PDF files within seconds.

Total Transparency Precise analysis of quantities, consumption rates, and historical trends.

Security & Control

Theft Protection Dispensing authorization exclusively via PIN, RFID transponder, or user roles.

Volume Limits Precisely restrict dispensing quantities using predefined quotas.

Never Run Empty Automated email alerts as soon as a predefined minimum stock level is reached.

Seamless API Integration

Automated Workflows Enables real-time data access, maximum scalability, and smooth data integration.

Field-Proven Direct interface compatibility with established third-party systems such as Agrarmonitor.

Industries

- **Transportation sector**
- **Construction**
- **Private fleets**
- **Material extraction**
- **Agriculture**
- **Car dealers & more!**

Modules

BASIC | STANDARD | PREMIUM

Your benefits with the 3 package options

- Easy entry level for all device types
- Module division only acco rding to software functionalities
- Independent of hardware
- Future-oriented through scalability
- Reduction of administrative effort
- Clear structure / transparency
- Automated billing
- Payment via invoice, PayPal, credit card, etc
- Upgrade to the Premium module anytime
- 14-day trial version of the Premium module

See the **most important** information at a **single glance**!

- **Current Tank Level**
- **Refills**
- **Dispensed Quantities**
- **Fuel Level History**
- **Distance & Operating Hours**
- **Range Estimation**

And much more...

NEW! Interactive **Map View**

The myTecalemit Dashboard

The dashboard forms the digital foundation and the heart of the myTecalemit web software. It consolidates complex data streams from all your connected fuel terminals and tank level gauges into a single, intuitive interface.

Hardware-independent & web-based Secure, worldwide SSL access in the browser via PC, tablet, or smartphone.

No software installation Instantly ready for use with zero local IT effort.

- **Everything at a Glance**
- **Real time data**
- **Easy to understand**
- **Easy to use**

Setup & Management

Manage your data and devices in a clearly structured user interface directly in your browser.

- **Central Management & Configuration of Your Devices** Set up your systems and view locations, fill levels, or battery statuses at a glance.

- **Master Data Management for Your Assets** Manage media, drivers, and vehicles seamlessly. Take advantage of organizational features like driver and vehicle groups for an optimized overview.

Smart Analysis

Manual Excel lists and collecting fuel receipts are a thing of the past. The myTecalemit Cloud transforms raw data into valuable economic insights.

Tailored Analytics Utilize a wide variety of evaluation types and benefit from automated report generation and scheduled delivery.

Clear Data Visualization Leverage graphs, charts, and visual dashboards for a fast, intuitive overview of all operationally relevant key figures.

Customizable Tables The system allows for flexible object selection and effortless data export as both CSV and PDF files.

Complete Transparency Precise tracking of tank fill levels, individual fuelings, and dispensed volumes.

Automated Report Delivery Configure it once – reports (e.g., CO2 reporting) are delivered fully automatically via email.

Flexible Data Export Export all tables and evaluations as PDF or CSV files within seconds.

Advanced Metrics Direct calculation of average fuel consumption and range estimations.

Flexible Object Selection Filter and save evaluations targeted specifically by vehicles, drivers, or products.

NEW! CO² Reporting

Protection & Control

Fuel is a valuable asset. The myTecalemit Cloud provides you with comprehensive tools to prevent misuse and optimize your purchasing planning.

Permissions Management Utilize user roles and authorization processes to grant your users exactly the specific permissions they need.

- **User Roles**
- **Transponders**
- **PIN-Code**
- **Dispensing contingent**

Two-Stage Theft Protection Fueling is restricted strictly to authorized users via PIN code, RFID transponder, or user role.

Precise Quota Management Flexible limitation and control of maximum dispensing volumes per driver or vehicle.

Live Level Monitoring Keep a constant eye on current tank volumes in real time (dependent on configuration).

GPS Tracking (Mobile units like Flow) Always know exactly where your system is located.

Seamless Integration

The myTecalemit Cloud is not designed as an isolated software solution, but as an open team player within your existing IT infrastructure.

The API functions as a live digital bridge: as soon as a vehicle refuels, consumption and billing data flow directly into your existing software infrastructure without any delay.

This ensures up-to-date bookings, precise controlling processes, and error-free billing at the touch of a button.

Powerful API Interface Automated real-time data export directly into your ERP, dispatching, or billing systems.

Complete Overall History Manual logging of external fuelings on the road and quick fueling corrections are easily possible.

Field-Proven Interfaces Direct, seamless compatibility with leading industry solutions such as Agrarmonitor.

Smart Supplier Integration Share tank data with logistics partners to enable proactive refilling without emergency orders.
